

MUHAMMAD TILAL

AI Project Manager | Conversational AI & LLM Delivery

Islamabad, Pakistan (Open to relocation) • +92 332 056 1173 • muhammadtilal@gmail.com

• LinkedIn: <https://www.linkedin.com/in/muhammad-tilal-7b955a61/> • GitHub: <https://github.com/mtlal>

PROFESSIONAL SUMMARY

AI Project Manager with 14+ years across enterprise AI delivery and university program management. Currently drive end-to-end delivery of conversational-AI products including voice bots, agent-assist chatbots and QA-automation platforms. Own schedules, sprint execution and stakeholder coordination on behalf of the product owners. Backed by hands-on ML / computer-vision experience and an MS from Chalmers University of Technology, Sweden. Building toward product and program management through the IBM Product Manager Professional Certificate (Coursera).

CORE COMPETENCIES & SKILLS

- **Project & Delivery Management:** Agile / Scrum / Hybrid delivery, sprint execution & ceremonies, delivery backlog & milestone tracking, scope / schedule / risk control, stakeholder & client management, UAT & release management, cross-functional coordination
- **Conversational AI:** ASR, NLU, LLM, RAG, TTS pipelines; voice-bot & chatbot delivery; AI-driven QA automation for voice; NLP annotation workflows
- **ML / Computer Vision:** Object detection & segmentation (YOLOv5–v8+, SAM / SAM2), CNNs, model fine-tuning & benchmarking, TensorFlow, PyTorch, OpenCV, CUDA; cloud / on-prem / edge deployment
- **Teaching & Academia:** 14 years lecturing across communication, signal & image processing and digital design; FYP supervision, curriculum design (OBE / HEC), student advising, industry liaison, Google Classroom
- **Technical:** Python, SQL (MySQL, PostgreSQL), Docker / Docker-Compose, Jira, Git, Linux; NVIDIA GPU & Jetson Xavier edge hardware

PROFESSIONAL EXPERIENCE

Project Manager (AI Delivery)

Mar 2025 – Aug 2026

Veyn.ai (sister concern of STech Pvt. Ltd.) - Islamabad, Pakistan

- Project manager for 3 concurrent enterprise conversational-AI products for telecom and healthcare clients, each with a dedicated product owner; led end-to-end delivery across 4 cross-functional teams (ML, NLP, QA, engineering) through Agile

AI-Based QA Automation Platform

- Managed delivery of an AI-powered QA system for customer-service call centers — automated call scoring, compliance monitoring and agent-performance analytics via ASR, NLU and speech-analytics integration. **Built an AI system that evaluates 10,000+ minutes of calls daily at 85%+ accuracy across service-delivery and service-accuracy parameters.**
- Defined sprint plans and delivery KPIs (call coverage rate, scoring accuracy, compliance-flag rate); owned UAT, defect resolution and production rollout as primary client interface.

AI-Based Voice Bots

- Delivered multilingual, real-time IVR voice-bot solutions across the full ASR / NLU / dialogue-management / TTS pipeline for enterprise customer-service automation.
- Coordinated telephony-infrastructure integration, load testing, performance benchmarking and production deployment; drove post-launch improvement cycles from call analytics and drop-off patterns. **Deployed real-time voice bots with a 13% drop-off rate and a 25% reduction in average handle time versus live agents.**

Enterprise Intelligence Platform (EIP) Chatbots

- Managed delivery of LLM-powered agent-assist chatbots — knowledge retrieval, response suggestion and automated escalation routing — supporting live customer-service representatives.
- Led requirements workshops, design reviews and sprint execution across NLP, backend and UI teams; managed scope changes and integration risk, tracking gains in agent handle time and first-contact resolution. **Achieved 75% first-contact resolution on bot-handled chats.**

AI Engineer**Nov 2023 – Feb 2025****STech (Pvt.) Limited · Islamabad, Pakistan**

- Designed and developed GPU-accelerated Python CV/ML pipelines for object detection and classification in images and video for an oil-and-gas client; benchmarked, fine-tuned and optimized open-source models (YOLOv5, YOLOv8+, SAM, SAM2 by Meta AI) on custom datasets for production deployment.
- Containerized applications with Docker / Docker-Compose and deployed to NVIDIA GTX 1080 Ti and Jetson Xavier edge hardware, on-site and remote.

Lecturer & Program Manager**Nov 2015 – Jul 2025****Air University · Islamabad, Pakistan**

- Designed and delivered undergraduate courses in Digital Image Processing, Analog & Digital Communication, Digital Logic Design, and Signals & Systems, with lab components in signal processing and computer-vision fundamentals.
- Convener, Final Year Design Project Committee — managed a portfolio of 50+ engineering projects annually (proposals, milestones and final assessment) and supervised AI / computer-vision projects including obstacle detection, intelligent navigation & control, and GSM-based tracking.
- Chief Organizer, IEEE INMIC 2016 international conference; member of the Departmental Industrial Advisory Board and Campus Industrial Liaison Committee; contributed to OBE-based curriculum redesign aligned to HEC standards.

QA Evaluator & Team Lead**Nov 2020 – Jun 2022****Appen Limited, Australia · Remote**

- Led a team of 5+ evaluators for QA validation of AI audio transcription, NLP annotation and image/video annotation for ML applications.
- Guided team members to maintain quality standards and ensure timely, accurate task completion.

Lecturer & FYP Supervisor**Dec 2011 – Nov 2015****COMSATS University Islamabad, Attock Campus · Pakistan · On-site**

- Designed and delivered undergraduate courses in Principles of Communication Systems, Digital Signal Processing, Probability for Engineers, and Electronics I & II, with applied, lab-based learning.
- Supervised final-year projects in autonomous systems and embedded intelligence — obstacle detection & avoidance, an intelligent NAVCOM system, a cruise-control module and a GSM tracking device — across the full project lifecycle.
- Served as Program Advisor to BS Electrical Engineering students and sat on the FYP Assessment & Approval, Industrial Liaison and Student Affairs committees.

EDUCATION**MS, Communication Engineering****Sep 2008 – Dec 2010****Chalmers University of Technology · Gothenburg, Sweden**

UK equivalent: RQF Level 7 (ENIC/ECCTIS statement available). Thesis: Effects of Jamming on IEEE 802.11p Systems.

BE, Electrical Engineering**Aug 2003 – Dec 2006****National University of Sciences & Technology (NUST) · Islamabad, Pakistan**

Rector's Gold Medal for Best Undergraduate Final Year Project. Final project: GSM-based terminal for remote energy-meter reading.

CERTIFICATIONS & DEVELOPMENT

- IBM Product Manager Professional Certificate** — Coursera (*in progress, 2026*) — building toward a product / program-management transition: AI product strategy, discovery, roadmapping & prompt-aware requirements
- Enterprise Design Thinking Practitioner** — IBM SkillsBuild, 2026
- Convolutional Neural Networks** — DeepLearning.AI (Coursera), 2024
- Structured Query Language (SQL)** — Univ. of Colorado Boulder (94.4%) & Univ. of Michigan (100%), 2023

ADDITIONAL

- AI Tooling:** Claude Code, Cowork & Claude Design, Cursor, ChatGPT, Google AI Studio — used daily in delivery workflows.
- Languages:** English (fluent, English-medium instruction throughout); Urdu (native)
